Basic Microbiology eLearning Curriculum

Curriculum Description

The Basic Microbiology eLearning Curriculum provides online training for public health laboratory professionals in the area of basic microbiology laboratory skills and procedures necessary to identify microorganisms from clinical specimens. Each course is comprised of interactive, concise content allowing for completion during open periods throughout the day. Job aids and laboratory exercises are included so participants may work with a supervisor/mentor to comprehend and perform proper microbiology techniques. The basic microbiology curriculum includes five eLearning courses.

Basic Microscopy

To function effectively in a microbiology laboratory, laboratorians must have a basic knowledge

2. Select first course – because you don't have an account it will tell you to create one

Once you have finished all sections (i.e. the red mark has been removed), click on “Save” below

Some of these sections are tricky- I found I had to fiddle with the address section in particular. It seems to want a street address starting with a number – just make one up if you don’t have one!

Your profile contains all your system settings and attributes. Please note that some fields are required, until you complete all required settings some site functionality may be limited. For your convenience each section in the profile will indicate if it is incomplete.
